OBJECTIVE

Seeking a challenging entry-level MERN Stack Developer position to leverage my proficiency in React, Redux Toolkit, Node.js, Express.js, and MongoDB, along with my knowledge of Tailwind CSS and Boostrap ,to create engaging and scalable web applications. I am passionate about web development and eager to contribute to innovative projects, utilizing my strong problem-solving and teamwork skills to deliver high-quality solutions.

PROJECTS

NetflixClone

- The Netflix clone is a web application designed to mimic the some features of the Netflix platform, showcasing proficiency in web development, API integration, and authentication
- User login using email and password. Powered by Firebase Authentication
- Frontend: react.js, Typescript, Tailwind css
- The application fetches movie posters and trailers using the TMDB API. Displays a variety of categories such as Trending, Top Rated

GameStore

- Developed a dynamic web application for browsing and managing video games using the RAWG API. The app allows users to explore games by genre, view ratings, and manage a personalized wishlist
- Frontend: React.js, Typescript, Tailwind CSS
- State Management: Redux Toolkit
- Routing: React Router for navigation

Weather Now

- "Weather Now," is a simple and effective web application designed to provide users with real-time weather updates.
- It helps users quickly access current weather information by entering the name of a city and users can view details such as temperature, weather conditions, and other relevant data.
- The app integrates with a weather API (OpenWeatherMap) to fetch live weather data.
- Technologies Used: Reactjs, Tailwind css
